

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant : Thomas J. McMurphy et al. Art Unit : 1616
Serial No. : 10/034,522 Examiner : M. Hartley
Filed : December 20, 2001
Title : DIAGNOSTIC IMAGING CONTRAST AGENTS WITH EXTENDED BLOOD
RETENTION

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

COMMENTS ON STATEMENTS OF REASONS FOR ALLOWANCE

In the Notice of Allowance dated September 12, 2003 for the above-referenced case, the Examiner stated that "the primary distinguishing feature is the phosphate linker which connects the specific chemical moieties shown in the claims to the chelating agent." While Applicants agree that the phosphodiester moiety is a distinguishing feature of the allowed claims, Applicants respectfully assert that it is not the "primary" distinguishing feature. Applicants respectfully submit that the overall chemical structure of the claimed compounds distinguish the claimed compounds from prior art compounds.

No fee is believed due for this submission. Enclosed concurrently herewith is a \$1660.00 check in payment of the Issue Fee in this case. Please apply any other charges or credits to deposit account 06-1050.
